

CASECRACKER

ONYX

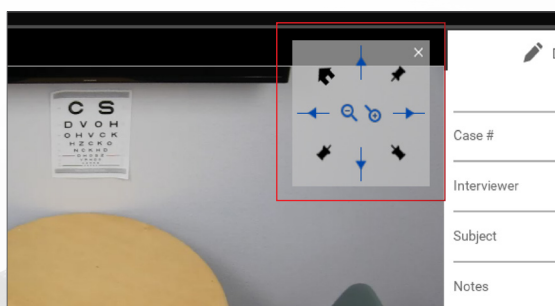

RECORDING FOR SUCCESSFUL CLINICAL PROGRAMS

CaseCracker Onyx is an effective recording tool that enables clinical professionals to collaborate, train, and study sessions to improve diagnoses and treatment. With features like live remote viewing and built-in PTZ controls, researchers, psychologists, teachers, and family members can watch nearby to trade ideas effectively and efficiently.

- **Record, review, and export clinical recordings remotely from your Windows PC**
- **Export recordings in open file formats like .mp4—playable on any computer**
- **Add flags and annotations to key points of the recording during or after the interview to collaborate with clinical professionals**
- **Easily customize session data fields to reflect the patient name, physician name, therapy type, etc. to meet your organization's needs**
- **Search by keyword or sort the recording archive to quickly navigate to saved recordings**
- **Catch the important close-up details with a discreet PTZ camera and camera controls built-in to the software interface—no extra equipment required**
- **HIPAA compliant with user and group permissions, event logs, report generation, and secure network recording**
