

FTK® SUITE

No matter the type of forensic investigation, there's an FTK solution designed for your investigative workflow—all with the industry's fastest processing engine for repeatable, defensible, forensically sound collection and analysis.

Get a comprehensive view of exactly what happened and who was involved in any criminal or civil investigation. With our award-winning, court-cited digital forensics expertise, Exterro gives you the industry's best tools to help you analyze computers, mobile devices, and network communications. When you know more, you can do more.

The **FTK Suite** is comprised of six digital forensics solutions to manage all types of DFIR investigations, from criminal law enforcement cases to corporate internal investigations. Many of the FTK solutions are interoperable and can be combined in powerful, scalable, complementary workflows. All solutions are powered by the industry gold standard for processing and stability—FTK.

FTK Imager Data Preview & Imaging tool.

Which FTK is right for you?

FTK® Imager for Data Preview & Imaging

FTK Imager is a **FREE** data preview and imaging tool that lets you quickly assess electronic evidence to determine if further analysis with a forensic tool such as Forensic Toolkit (FTK®) is warranted. Create forensic images of local hard drives, CDs and DVDs, thumb drives or other USB devices, entire folders, or individual files. Generate hash reports and mount images.

FTK® Central for Web-Based Collaboration & Forensic Review

FTK Central features limitless scalability, blazing-fast processing power and simplified forensic review on a collaborative web-based platform. The user-friendly and intuitive UI enables frontline investigators to easily review their own evidence, reducing lab backlogs. By centralizing evidence, agencies can collaborate within and across jurisdictions.

The Original FTK® Forensic Toolkit

The gold standard in digital forensics, FTK Forensic Toolkit is the industry's preferred solution for repeatable, defensible full-disk image collection, processing and analysis. Parse and analyze data faster and better, all while ensuring your evidence is preserved in a forensically-sound manner. Decrypt files, crack passwords, parse registry files, and data carve in unallocated disk space. Find the data other tools miss!

FTK® Lab for Large-Scale Investigations & Distributed Processing

Divide and conquer massive data sets in a collaborative, scalable environment with FTK Lab. As a centralized investigative platform, FTK Lab adds powerful web-based review functionality with lightning-fast DPE processing, getting evidence into the hands of investigators to solve cases and secure indictments faster. Easily deployed in a cloud environment like AWS or Azure to control costs and save on hardware.
