

UNIFIED INVESTIGATIONS PLATFORM

QUICK GUIDE

DIGITAL FORENSICS SOLUTIONS

BALLISTIC IMAGER

Selected as a **FINALIST** for the coveted SC award for the **Best Computer Forensic Solution** in 2022

The world's fastest forensic imaging tool

The go-to solution for rapid data acquisition. Used in the field and in labs, Ballistic Imager can forensically secure 1TB in less than 8 minutes, offering speeds that are 4x faster than the average.

- Blisteringly fast data capture from computers, laptops and servers
- Patented technology that bypasses hardware limitations by extracting data through multiple collectors, simultaneously
- Collect data from devices without removing hard-drives
- Present captured data as an EO1 or DD image for further analysis through Detego Analyse
- Highly portable – fits in removable storage devices, making it ideal for frontline agents
- Intuitive design and ease of use, enabling even non-technical users to be fully operational with a 30-minute training

FIELD TRIAGE

WINNER of the 2022 Security and Policing Innovation Award in Digital Forensics

Quick digital forensic analysis, anywhere

A highly portable field-based solution that's perfect for investigating data on PCs, laptops, servers and loose media. Field Triage swiftly identifies and alerts users of data related to investigations without running time-consuming data extraction and analytical processes.

- Get instant visual alerts of suspicious items through the patented red-amber-green visual alert system to enable snap decision-making
- Easily customise and deploy across a range of investigations covering fraud, human trafficking, terrorism, indecent images of children, financial crime, insider threats and more
- Scan a target device and acquire all usernames and passwords used in less than 30 seconds
- Empower non-technical users with an easy-to-use interface

MEDIA ACQUISITION

Rapid, automated data acquisition

A smart tool that automates digital data capture from removable media, computers and hard drives (HDDs and SSDs).

Media Acquisition comes with a simple, intuitive interface, allowing users to quickly analyse multiple devices in minutes.

- Concurrently secure and analyse data from multiple removable devices
- Acquire data from hard drives removed from damaged systems
- Get live views of logical data as it is streamed into the platform and receive automated alerts on suspicious items through Detego's patented red-amber-green visual alerts
- Access powerful carving tools to recover deleted data

DETEGO MD powered by GMD SOFT

Seamless data acquisition from mobiles, smart devices and apps

Detego MD combines GMDSOFT's leading data extraction and decryption capability with Detego Analyse's robust analytics, automation and reporting to provide access to 1,000s of devices and apps.

- Gather forensically sound data from tens of thousands of phone models and more than 2,000 apps
- Extract data from IoT devices, smart TVs, Sat Navs, drones and more
- The gold standard for unlocking and accessing data from Android devices
- iOS support including backup file decryption and keychain extraction
- Carry out physical and logical extractions on Android, iOS, Windows OS, Tizen OS and other mobile OSs

REMOTE ACQUISITION

Fast data extraction over the network

Remote Acquisition taps into our patented, rapid imaging technology to enable fast imaging over networked environments.

Forensically secure system information, RAM data, usernames and passwords, internet artefacts and physical images from endpoints. Enjoy the added flexibility of resuming extractions from previous cut-off points in the event of network failures/drops.

- Gather data through network agents that can be deployed in covert or normal modes
- Install network agents manually or remotely via Windows Remote Management
- Trigger targeted data extractions or simply create a complete physical image
- Remotely image storage media that's plugged into networked computers or laptops

ANALYSE

Produce digital intelligence at speed

Integrate all forensic acquisitions through this central platform and leverage powerful AI and automation features to promptly provide in-depth analysis, intelligence and court-ready reports.

- Use comprehensive analytical workflows and AI-powered object detection to identify people, weapons, drugs, nudity, indecent images and more
- Utilise Optical Character Recognition (OCR), enabling the extraction of text from images and video evidence plus offline language translation to convert indexed text from over 230 languages to English
- Use Photo DNA Matcher to swiftly identify images with photo DNA and hash matches relevant to investigations
- Easily decrypt passwords from over 300 file types

FUSION

Advanced link analysis

Detego Fusion enables investigators to leverage advanced link-building capabilities to expose connections between people, places, devices and cases.

- Use advanced AI-driven link analysis infrastructure to connect the dots and expose hidden links across digital exhibits

- Access file properties, internet artefacts, communication history (email addresses, call events, contacts, messages, credentials), device information, financial information, and keywords to rapidly identify and link suspects
- Instantly view links that exist between cases by using the visual preview functionality

FEATURES

	Data extraction from hard drives (HDDs, SSDs, SATA drives)	Data extraction from loose media (USBs, SD cards and more)	Data extraction from drones	Logical data extraction from mobiles and smart devices	Advanced physical data extraction from mobiles and smart devices	Rapid imaging of laptops, PCs and servers	Fast data extraction from devices connected to a network	Triage laptops, PCs and servers	Analysis and reports through Fusion and Analyse

Find the Detego package that's right for you

STANDARD	✓	✓	✓	✓				✓	✓
PRO	✓	✓	✓	✓		✓		✓	✓
ULTIMATE	✓	✓	✓	✓	✓	✓	✓	✓	✓

All three packages come with **Detego Covert** (a solution that discreetly acquires passwords, system information, files, internet artefacts, deleted data and a complete forensic copy of target devices) and **Detego Boot** (which allows users to forensically secure data from computers and laptops that are powered down).

Customers can also buy the above modules as standalone solutions.

CASE MANAGER

Centralised Management of Evidence, Incidents, Investigations and Organisation-Wide Risks

Detego Case Manager is a one-stop platform that enables the effective end-to-end management of investigations, incidents, risks, evidence and compliance.

Our fully customisable technology enables teams to collaborate easily, follow procedures, minimise errors, improve productivity and securely store data that's related to investigations. Case Manager was built in collaboration with some of the most experienced compliance and investigation professionals in the world, and it can be fully customised to meet the unique needs of any organisation.

With all incidents, cases and evidence in one place, you can streamline your investigations and allow users to access data anywhere, from any connected device, while maintaining complete compliance.

Case Manager equips your teams with:

- An intuitive interface and fully customisable workflows to enable users to manage incidents, investigations, cases and exhibits with minimal technical knowledge
- A single platform to centrally manage all physical and digital exhibits and data, with location tracking for better peace of mind
- An action hub for investigators to prioritise and centrally manage tasks – enabling managers and investigators to create, assign and track task progress
- A visual workflow creator to simplify the development of custom workflows and manage dependencies
- A central workflow and form management capabilities to enable the quick implementation of system-wide changes
- A reduced paper trail thanks to an intuitive form creator that helps create ISO 9001 compliant forms for better data collection
- Complete tracking of all user actions – enabling fully auditable case management
- Valuable insights such as the financial and reputational impact of cases, the number of open, closed or pending cases and the time spent on each investigation to enable better informed decision-making
- Easily accessible reports that can be refined via timeframes to enable the quick analysis of daily, monthly or yearly performance
